28 June 1983

MEMORANDUM FOR THE RECORD:

SUBJECT: Review of DDI Projections of FTE

REFERENCE: a. DDI Estimated Attrition and

Accessions and Projected 1983 FTE OP Projection of DDI FTP Usage for

FY 1983 (as of 26 May 1983)

I. The estimates of attrition for the DDI were reported at 17 per month. The number of losses, based on OP data base, have been an average of 34 per month in FY 1982 and FY 1983. Table 1 shows the actual losses per month in FY 1983. Based on these numbers, the DDI estimates appear to be much smaller than expected. Using the revised attrition rate of 34 per month and DDIs method of estimating FTE, Table 2 shows that the DDI will use FTE and not

25X1

I contacted DDI and talked with DDI Budget Officer, who states that his data is directly from our FTE model. The problem is that our model reflects losses after internal gains have been subtracted. Since the DDI included internal Gains and EODs in their "known gain" estimates and also in their "net outflow" attrition, their internal gains were counted twice. The net result was the use of an attrition rate that was only about half of what they have been experiencing. An adjustment of their figures to reflect a realistic attrition level would result in a projected FY 1983 DDI FTP underage of about 24 rather than the six they estimated. Therefore, it would appear that the DDI can well afford the recently proposed Comptroller reduction of 13 FTP. In fact, it looks like the DDI will have to really scratch to use the rest.
